Why Choose No.A.H.?

Certified Excellence

Our services are backed by recognized certifications such as those from Inmarsat, FDA, CE, and HTCert. Compliance with international standards - ISO 9001:2015, ISO 14001:2015, ISO 13485:2016, ISO 22301:2019, ISO 27701:2019, ISO 27001:2022, ISO 45001:2018, ISO 37001:2016 - ensures the highest level of service quality, data security, and operational continuity.

Expert Care, Anytime, Anywhere:

With 24/7 access to all medical specialties, our global network of medical experts provides your crew with the right care at the right time, regardless of your location.

How it works in 5 simple steps

1

All the collected medical data of a seafarer is transmitted quickly and securely to the Private Cloud of No.A.H.'s Telemedicine system.

2

A TMA coordinator receives the medical case and transfers the collected medical data to the corresponding specialized doctor.

3

All medical specialties operate on a 24/7 basis, providing continuous support to the network.

4

There is always the option for live video communication through the TMA's teleconferencing systems, in real-time, between the patient or caregivers and the doctor, allowing the patient to receive specialized medical advice and care from the appropriate doctor for the case.

5

If it is deemed medically necessary for a seafarer who has suffered an illness or accident to be hospitalized or repatriated, the Shipowner/ Manager, as provided by industry-specific (MLC 2006), individual, or collective employment agreements, is hold liable for providing compensation for Death, Disability, Sickness Wages, Hospitalization and Outpatient Expenses, as well as Replacement and Repatriation expenses all are covered from the Insurance company.

Comprehensive Care Delivered through Compact Solutions

Advanced Portable Telemedicine Kit:

Our portable telemedicine system is more than just equipment; it's a lifeline. Designed for comprehensive diagnostics including blood pressure monitoring, ECGs, spirometry, and advanced imaging like radiography and ultrasound, these tools bring hospital-level care to the maritime setting. Each kit is robust, user-friendly, and requires minimal training, ensuring readiness and reliability.

OPTIONAL HARDWARE

Integrated Medical Devices DESIGNED FOR MARITIME USE

Telephonic Stethoscope

Hear and diagnose with clarity even across the seas.

12-Lead EKG

Comprehensive cardiac monitoring to ensure heart health.

Vital Signs Monitor

Continuous monitoring for critical insight into crew health.

- 1 Drug & alcohol detection
- 2 Portable Ultrasound
- 3 X-RAY/DR X-ray equipment
- 4 Smart Glasses
- 5 Digital Thermometer

- 6 Digital stethoscope
- 7 12 Lead ECG
- 8 Spirometer
- 9 Portable biochemical analyser
- 10 Multiparameter analyser
(Glucose, Lactic Acid, Ketone,
Cholesterol, Uric Acid)

- 11 Video Ophthalmoscope
 - Digital Dermoscope
 - Digital Otoscope
 - Digital Endoscope
 - General Examination Camera

Let us help you take the vital step towards enhanced maritime safety and efficiency.

Dr. Philip Sotiriades, CEO TMA

Tailored Solutions for Every Vessel:

Each ship has its own character, each crew, its own needs. We tailor our telemedicine solutions to fit the specific requirements of your maritime operations, covering everything from routine care and emergency responses to comprehensive chronic disease management.

Tangible Benefits for Maritime Companies:

- ✓ **Minimize Downtime:** Swift, on-board diagnostics and immediate treatment recommendations drastically reduce the need for port calls and crew downtime.
- ✓ **Reduce Costs:** Dramatically cut costs associated with medical diversions and onshore visits. Evidence from a large sample of 23,299 commercial ships shows that No.A.H. could prevent one in five ships from diverting course for medical reasons, potentially saving the industry \$168 million annually.
- ✓ **Crew Safety and Morale:** Reliable and immediate medical care enhances crew morale and operational safety, crucial for long voyages.

- ✓ **Immediate Assistance**
Access to all medical specialties available 24/7.

- ✓ **Expert Care**
Qualified professionals respond on the first call.

- ✓ **Medical Records Management**
Specialized in handling medical reports and diagnostics for personal injury claims.

- ✓ **Multilingual Support**
Assistance available in multiple languages to accommodate diverse communication needs.
